Department of Computer Science and Engineering

ASSESSMENT TOOL 1 – APPLICATION BASED QUESTIONS

Course Code:	MLA0103	Course Title:	AI with Expect Systems
CO Assessed:	CO1 - Precision (BL1, BL2, BL3)	Assessment:	Assessment Tool 1 – Application Based Questions
Weightage:	40% of CIA	Total Marks:	100 (2 Questions × 50 Marks)
CO1 Statement:	<i>Determine algorithm efficiency using asymptotic notations and mathematical techniques including Master Theorem and substitution method. (BL1, BL2, BL3)</i>		
Student Name:	K. Bhanu Prakash	Reg. No.:	192525184
Section / Batch:	2025	Date:	17-7-26

Instructions to Students

- Answer BOTH questions. Each question carries 50 Marks. Total: 100 Marks.
- Clearly show all steps in derivations and complexity analysis.
- Use proper asymptotic notation (Big-O, Big-Θ, Big-Ω) wherever required.
- Justify each step in recurrence solving using appropriate methods.
- Neat presentation and logical explanation are mandatory

Apply Master Theorem and asymptotic- Q2
analysis to real-world scenarios Q1 Q1 -50 Q2 -50

Application-Based Questions

SECTION A – APPLICATION BASED QUESTIONS

Q 1. Robotics Based on AI Expert Systems (Detailed Explanation)

Robotics is a branch of engineering and Artificial Intelligence (AI) that deals with the design, construction, operation, and application of robots. A **robot** is an intelligent machine that can perform tasks automatically or with minimal human intervention. Modern robots use AI techniques to understand their environment, make decisions, and complete tasks efficiently.

Program Code:

RobotExpertSystem.java

Share

Run

```
1- import java.util.Scanner;
2
3- public class RobotExpertSystem {
4
5-     public static void main(String[] args) {
6
7         Scanner sc = new Scanner(System.in);
8
9         System.out.println("=== ROBOTICS AI EXPERT SYSTEM ===");
10
11         System.out.print("Is an obstacle detected? (yes/no): ");
12         String obstacle = sc.nextLine();
13
14         System.out.print("Is the battery low? (yes/no): ");
15         String battery = sc.nextLine();
16
17         System.out.print("Is a human detected? (yes/no): ");
18         String human = sc.nextLine();
19
20         System.out.print("Is the path clear? (yes/no): ");
21         String path = sc.nextLine();
22
23         System.out.println("\n=== EXPERT SYSTEM DECISION ===");
24
25         // Rule 1
26-         if (battery.equalsIgnoreCase("yes")) {
27             System.out.println("Decision: Return to charging station.");
28         }
29
30         // Rule 2
31
32-         // Rule 2
33-         else if (human.equalsIgnoreCase("yes")) {
34             System.out.println("Decision: Stop and interact with the human.");
35         }
36
37         // Rule 3
38-         else if (obstacle.equalsIgnoreCase("yes")) {
39             System.out.println("Decision: Obstacle detected.");
40             System.out.println("Action: Turn left or right to avoid obstacle.");
41         }
42
43         // Rule 4
44-         else if (path.equalsIgnoreCase("yes")) {
45             System.out.println("Decision: Path is clear.");
46             System.out.println("Action: Move forward.");
47         }
48
49         // Default Rule
50-         else {
51             System.out.println("Decision: Stop and analyze the environment.");
52         }
53
54         sc.close();
55     }
56 }
```

Output

[Clear](#)

```
=== ROBOTICS AI EXPERT SYSTEM ===
Is an obstacle detected? (yes/no): yes
Is the battery low? (yes/no): no
Is a human detected? (yes/no): yes
Is the path clear? (yes/no): yes

=== EXPERT SYSTEM DECISION ===
Decision: Obstacle detected.
Action: Turn left or right to avoid obstacle.

=== Code Execution Successful ===
```

Q2. Application: Online Learning Recommendation System

An online learning platform processes user interaction data using the recurrence $T(n) = T(n-1) + n$. Apply the substitution method to expand the recurrence step-by-step and derive the final time complexity. Clearly show intermediate steps and simplify the expression. Analyze how the algorithm performs when the number of users grows rapidly. Interpret the efficiency using asymptotic notation and discuss whether the system is scalable for large educational platforms.

56 }
57 }

```

Output:

Output

Clear

===== ROBOTICS WITH AI EXPERT SYSTEM =====

1. Healthcare Robot
2. Industrial Robot
3. Agriculture Robot
4. Home Service Robot
5. Security Robot

Enter application number: 2

===== EXPERT SYSTEM DECISION =====

Application: Industrial Robot

AI Decision: Check machine condition.

Action: Stop machine if a dangerous fault is detected.

Code of Conduct

I K. Bhanu Prakash (192525184) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the Student:

RUBRICS FOR CALCULATION

Criteria	Wt.	Level 4 – Exemplary	Level 3 – Clearly	Level 2 – Developing	Level 1 – Beginning
Understanding of Problem Context	20%	identifies all requirements	Good	understanding with minor gaps; some requirements unclear	Basic or misinterpretation of the problem

Application of Concepts	30%	Accurately applies appropriate concepts to solve complex problems	Applies relevant concepts correctly with minor errors	Applies basic concepts with limited accuracy	Fails to apply appropriate concepts
Problem-Solving Approach	20%	Logical, well-structured, and efficient approach	Mostly logical approach with minor gaps	Basic approach with some inconsistencies	Illogical or unclear approach
Accuracy of Solution	20%	Completely correct solution with proper justification	Mostly correct with minor errors	Partially correct solution	Incorrect or incomplete solution
Clarity	10%	Clear, well-organized, and properly explained solution	Understandable with minor clarity issues	Limited clarity and explanation	Poorly presented and difficult to understand

Marks Evaluation:

Question No.	Understanding of Problem Context (20%)	Application of Concepts (30%)	Problem-Solving Approach (20%)	Accuracy of Solution (20%)	Clarity (10%)	Total Marks
Q1 (50 Marks)						
Q2 (50 Marks)						
Overall Total (100)
